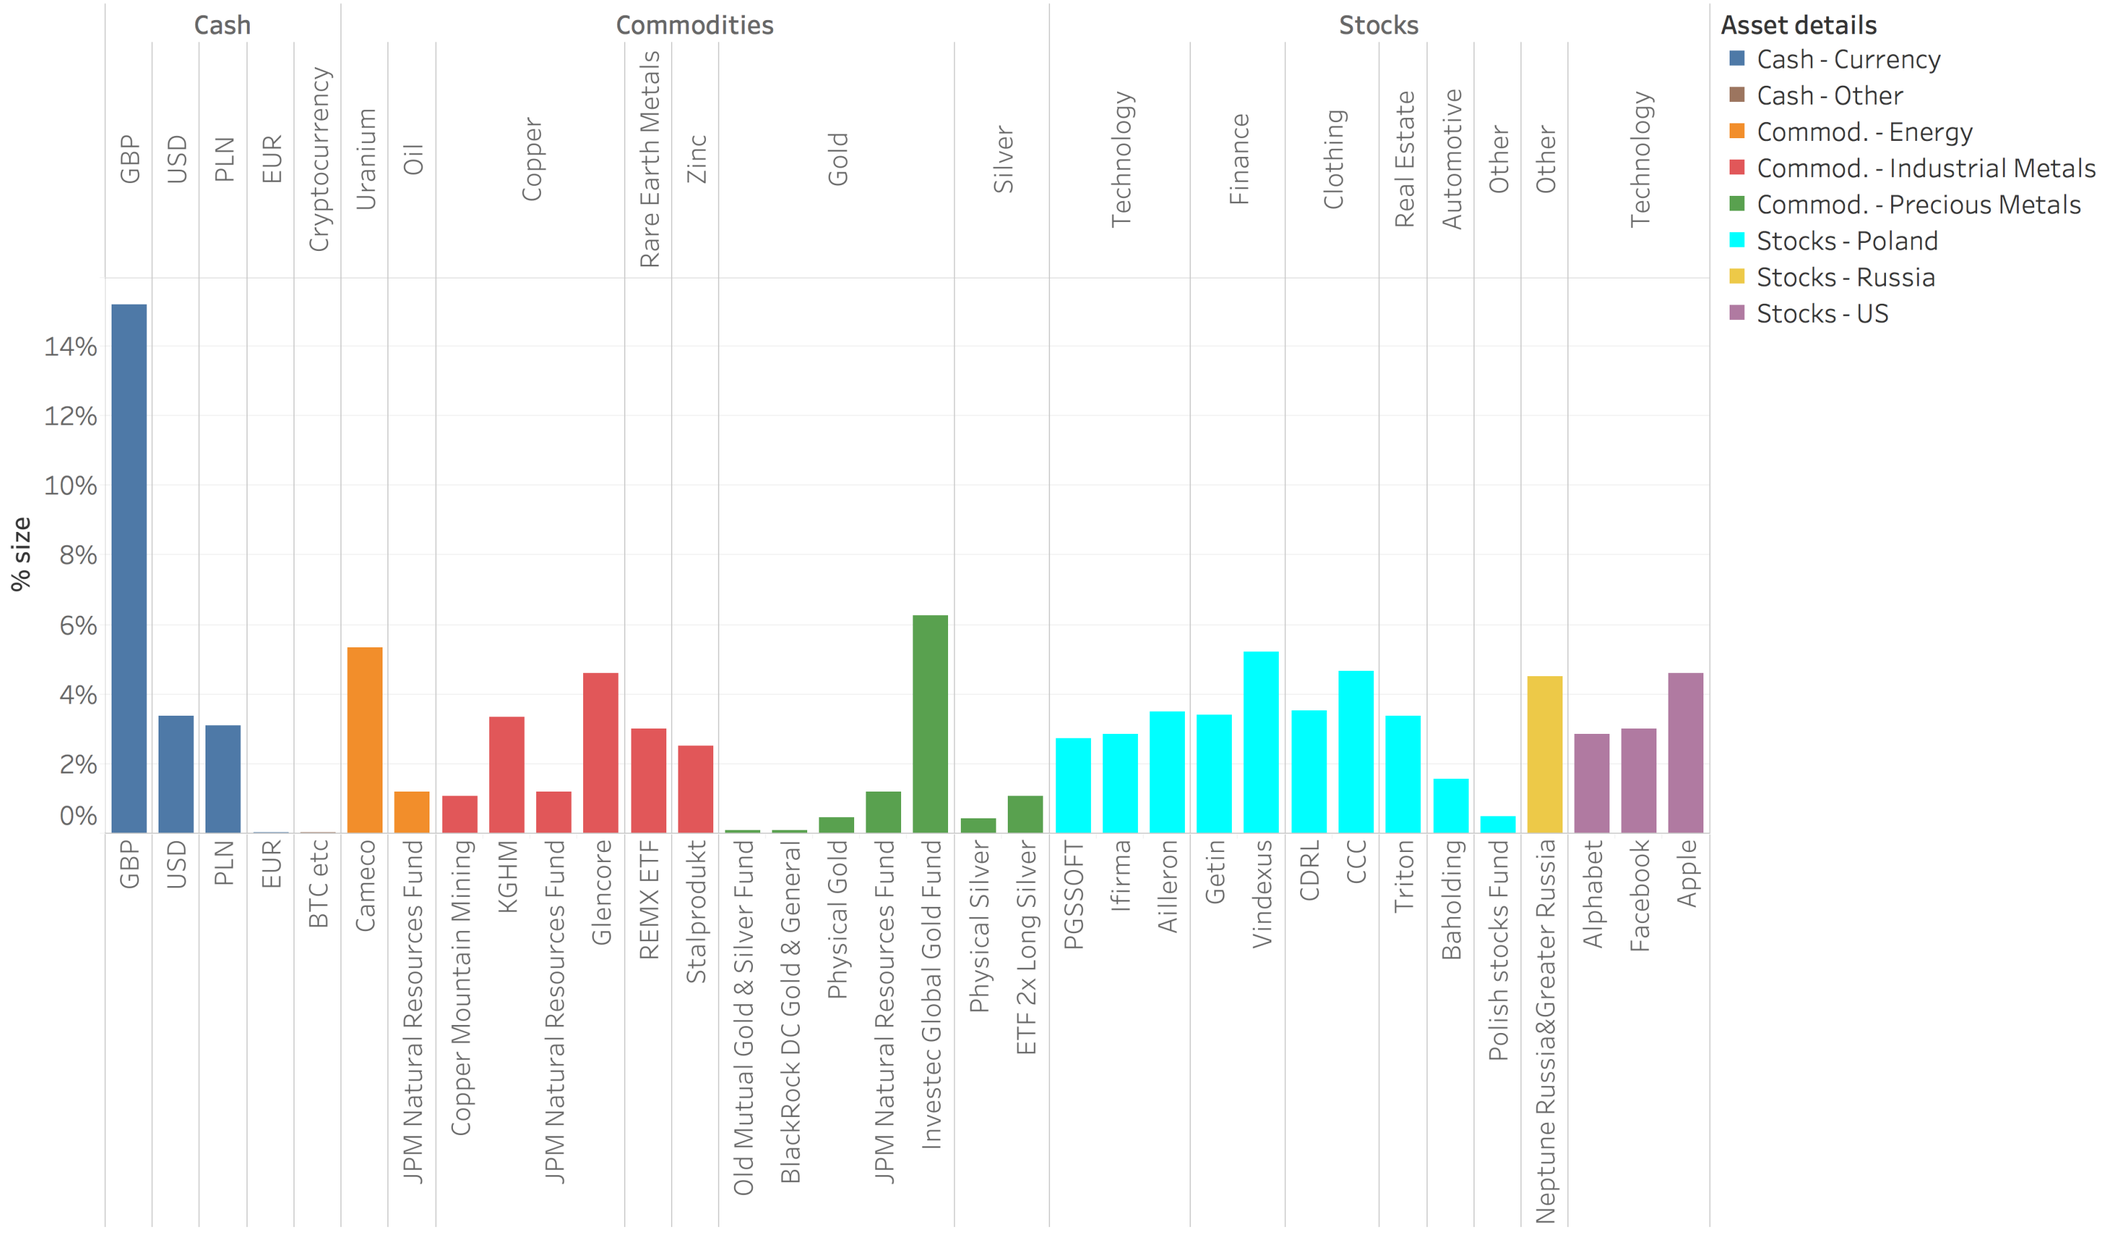
DAMIAN'S PICKS - JAN 2018



RISK WARNING

1. The value of shares and the income from them can fall as well as rise.

2. There is a big difference between the buying price and the selling price of these shares. If you have to sell them immediately, you may get back much less than you paid for them. The price may change quickly, it may go down as well as up and you may not get back the full amount invested. It may be difficult to sell or realize the investment.

3. You should not speculate using money you cannot afford to lose.

Please note I am not a regulated financial advisor and so any help will be non-advisory. If you are unsure of the suitability of any investment you should seek professional financial advice.
